

*** URGENT APPEAL FOR SUPPORT IN TRANSGENDER *
* HEALTHCARE FOR INMATES ***

The CDOC is changing its policy to Limit the Scope of Gender Affirming Care to include the ability to reject and Deny Individuals Gender Affirming Surgical Care, Such as Top Surgery + Bottom surgery. For one Individual @ New Haven CC, Surgical Intervention is Infact the only appropriate Gender Affirming Care Such as Top & Bottom surgery due to a Medical Contradiction with The Standard Hormone Replacement Therapy. All of her Providers Have Clearly stated That the ONLY appropriate intervention for her is Surgical Intervention. This Girl has Lived her entire life as Female and Possesses a License/ID and Birth Certificate that Clearly Lists her Birth Sex as female, She has been Raised and Lived as Female all her life + The Department Hides behind Policy "Not being clear" and "needing to Confer with Legal team" to Delay and Deny Care. Legislation + Support is needed to Force The Department to Perform all Gender Affirming care whether its Surgical intervention for Top or Bottom surgery

But also other services such as electrolysis for facial + Body for MTF individuals, Support is especially needed to support push for the CtDoe to give this Girl @ New Haven Corrections Her surgery Without Delay. She would be the first in The State put under surgery in the Department for Bottom Surgery. She Has the Medical necessity and has been ready since 2008.
