Testimony:

This communication is to document and report a current issue at walker ci wherein they have placed an inmate (Rodriguez) in seg improperly, pending investigation for what they know are false allegations by an inmate who has repeatedly provided false reports.

This inmate has been kept in seg for a week, no one has talked to him, mental health has not seen him a single time, and he is also going through a family death.

On or about 4/27/26 at approx 10:40am he reported issues to captain Ricky Ortega and stated he was feeling suicidal, Ortega's response was to take no remedial or protective action and to encourage the inmate to kill himself and the inmates death would "be just another notch on [his] belt."

On or about 4/29/26 at approx. 9:55am he also told D/W Whittingham that he was suicidal and she disregarded him and took no action.

I report these issues because their have been numerous inmate deaths and no suicides at MWCI, of which these same officials have been directly involved and may be once again.

As of now the inmate has not harmed himself but I wish to make a record in case anything occurs.
