Testimony:

As you know, I spent 37 years locked behind these Connecticut prison walls. But I've never seen the corruption I've had to live through since 1994, when John Rowland took over as Governor. And it has only gotten increasingly worse, in the intervening years. Especially since now, former Commissioner Angel Quirks took over the policies of the Connecticut prison system.

Right now we here at the MacDougall C.I., are being subjected to lockdowns nearly every other day for some of the moist asinine reasons, consisting of Code whites in the infirmary, to being locked down because of the correction staff attending one of their fellow Officers retirement party in the gymnasium or them attending their funeral. And its all being done to take away the increased out of cell time that Connecticut's Legislature voted into existence.

To the horrible conditions we have to deal with, with the grossly pathetic Health Service Unit and their nursing staff. These people should be arrested for their crimes against humanity.... So, count me in for helping to expose this corrupt system.

Yours truly in the struggle.
