Testimony:

Dear Correction Advisory Committee Members, I am concerned about the price the prisoners pay for the Television (\$ 240.00) and we cant' get good reception, because of the Interior Concrete Walls. For years, the Department Of Corrections have promised changes, and give they Word, that they will work with the prisoners, and get us, an antenna, a digital antenna. If we decide to place the antenna in the Windows, we will received a class B Disciplinary Report. All Level Four Facilities need an antenna. A digital antenna. We pay too much for these Television, and they are only 13 inches. We prisoners are just looking to receive the channel only out of the air and it seems the Union have a big problem with just the channels we get out of the air. This argument has been going on since 2009 when the system changed over to digital. I believe this information should be brought to the Commissioner. I hope it will make a difference. Any event, this is my testimony. I hope it make a big difference. No person out in the world paying \$ 240.00 dollars for a 13 inches television, and don't get good reception. We are people too, this is a crime out there.
