Testimony:

Dear Correction Advisory Committee:

I am writing because I would like to be allowed physical therapy, and speech therapy Occupational therapy as well as access to the use of "chucks" absorbent pads and sani wipes. I have problems using toilets and I need much needed therapy equipment. On my part I have been conjuring all of my will power to become more independent and vigorously exercise every chance I get so as to recover normal levels of agility. Paralysis has greatly diminished my ability to enjoy full range of motion for my left arm, hand and leg and foot. I still don't know what the full extent of brain damage I suffered because my PROVIDER has chosen not to help me. The medical staff here were torturing an elderly prisoner named Frederick Payne and I notified the Connecticut State Police. Mr. Payne was subsequently released from prison as a result. Medical nursing staff have expressed that that would like to send me out in a body bag. Apparently they were reprimanded for their unprofessional treatment of Mr. Payne. And thus have focused on denying me medical care or recovery efforts.
