

To whom it may concern (which is all your constituents),

I am writing to you on behalf of rational thought and of course, data. I am a father of 2 with one on the way. I want to respect your time, so I will keep this brief. I am not anti vax, I am not anti-science...I am simply a concerned parent who loves his family more than anything on this beautiful planet.

I am writing to you in hope that you will take the time to look at the data and try to understand the damage we are inflicting on our children. With the CDC constantly moving the goalposts regarding masks, no masks, cloth masks, N95 masks, it's time to step back and assess the damage. If you are immunocompromised, it's your choice to wear a mask. The data shows that if you are young and healthy, you are unlikely to fall ill from the virus. However, the data showing the damage of masks is substantial. We are the Constitution State and yet somehow, we are giving up our liberties to the unelected bureaucrats of the CDC. Connecticut is one of the last states imposing these draconian measures of masking our students. I will leave you with 3 powerful words...COGNITIVE VISUAL LEARNING. <https://greatgameindia.com/covid-rules-children-cognitive-abilities/>

Please give us, the parents, the freedom of choice...Mask Choice.

Sincerely,

Chris Jennings
